**XXF 11**

€ 866,50 + IVA

**XXF 31**

€ 1081,50 + IVA

**Mono Racing XXF.** In continuo sviluppo, XXF si posiziona ai vertici della tecnologia oggi disponibile.

**L'EVOLUZIONE** ha riguardato la diminuzione del peso complessivo, adottando un corpo in alluminio, parametro sempre importante nel Racing per la migliore risposta della moto agli ordini del pilota, nuovi set-up, sempre più pronto gara, ed un upgrade - soprattutto in chiave di maggiore **funzionalità e facilità di intervento** - della regolazione interasse e del precarico molla idraulico.

**L'INNOVAZIONE** è al suo interno, con inedite soluzioni tecniche per migliorare il coefficiente di smorzamento ed aumentare la stabilità alle alte temperature. Lo stelo Ø14mm incrementa la scorrevolezza mentre il pistone da Ø 30 mm riduce le masse di fluido in movimento per una risposta più veloce alle sollecitazioni. Tutte migliorie mirate ad ottenere la riduzione delle inerzie, e quindi un immediato controllo delle oscillazioni della sospensione. Una particolare attenzione è stata dedicata all'incremento di sensibilità e precisione delle regolazioni, ora tutte posizionate nella testina superiore.

**XXF 31**

**ABE**

***XXF racing mono shock. Under constant development, XXF sits at the top of current technology.***

***THE EVOLUTION*** of this shock has culminated in an overall weight decrease, using an aluminium body, which has always been a very important feature in Racing for better handling response to the rider's needs. In addition to new set-ups, even more race-ready, and an upgrade aimed at **better performance** and adjusting **simplicity** of the length and hydraulic spring preload adjustment.

***INNOVATION*** is in the internals of the shock, with new technical solutions for improving the damping coefficient and increasing damping consistency at high temperature. The Ø14mm rod improves sliding, while the Ø30mm piston reduces the mass of the fluid in motion. These improvements have produced a reduction of inertial forces, and therefore an immediate control of the suspension oscillations. Particular attention is paid to increase ergonomics and precision of the adjusters, which are all positioned in the upper portion of the shock.

# MONO POSTERIORE

## REAR MONO SHOCK

**XXF31 V2**  
€ 1081,50 + IVA

**OBIETTIVO** è di fornire al pilota una precisione di guida e un aumento del grip mai riscontrata fino ad ora ed una uniforme usura della gomma grazie al controllo istantaneo delle forze in gioco. Questo regala a chi guida, il massimo appoggio in curva anche ad estremi angoli di inclinazione, veloci cambi di direzione, massima confidenza nell'apertura del gas in tutti i tipi di tracciato, perfetta stabilità del retrotreno anche nelle staccate più violente.

**TARGET** is to give the rider the precise control and maximum grip increase, as well as even tyre wear which is provided by the immediate force damping. This provides confidence to the rider in the curve even at extreme lean angles, during fast direction changes, under hard acceleration while providing excellent stability of the rear, even under the most extreme braking, no matter the track or surface condition.

### INTERASSE REGOLABILE

Cura particolare riservata all'attacco inferiore per eliminare peso da questo prodotto già fra i più leggeri nel mercato, dove si trova la regolazione dell'interasse. Range di regolazione fino ad 8 mm permette di personalizzare l'assetto della moto.

### ADJUSTABLE LENGTH

Particular care is paid to the lower attachment in order to reduce un-spring weight from the shock which is already among the lightest in the market. The range of ride height adjustment up to 8 mm, allowing the rider to customize the bike's geometry.

| regolazioni                 | adjustments            | XXF11             | XXF31             | XXF31 V2          |

Ad ogni super sportiva il suo **XXF**.

Verifica nella lista applicazioni quale XXF è disponibile per la tua moto.

**XXF for every sport bike**

Check in the application list which XXF is available for your bike.

### PRECARICO IDRAULICO COMPATTO

Compattezza e leggerezza sono le caratteristiche del nuovo precarico idraulico.

### COMPACT HYDRAULIC PRELOAD

Compactness and lightness are features of the new hydraulic preload.

**XXF31 V2**

## MONO POSTERIORE REAR MONO SHOCK

**XXFB1**

€ 1285,00 + IVA

### Light Components

Questo prodotto ha un'altissima percentuale di leghe leggere speciali, le quali ne abbassano il peso.

**Light Components:** this product is manufactured with a very high percentage of **special light alloys**.

### Precarico pneumatico

DEDICATO AI PIÙ ESIGENTI è la versione più estrema del nostro XXF, lo stelo è trattato per una performance stabile nel tempo. Il precarico pneumatico, finora disponibile solo per i Team Ufficiali, è ora disponibile! Precisione, rapidità e leggerezza sono l'essenza di questo nuovo dispositivo. Azionabile tramite un serbatoio ricaricabile con innesto rapido, da richiedere separatamente.

### Pneumatic spring preloader

*Dedicated to the most demanding of riders, it is the most extreme version of our XXF, the piston rod is treated to reach a stable performance over time. The pneumatic spring preloader, up until now available only for official teams, is now available to everyone! Precision, speed and lightness are the essence of this new adjustment device. It works through a rechargeable tank with quick connection, available on demand.*

#### CARATTERISTICHE TECNICHE

TRATTAMENTO STELO DLC per la riduzione dell'attrito, e quindi una maggiore sensibilità durante le oscillazioni della sospensione.

#### TECHNICAL FEATURES

*DLC COATING to reduce friction, therefore providing an immediate damping feedback during the suspension oscillations.*

### CLU 11 - CLU 32

**STATE-OF-THE-ART TECHNOLOGY AND PERFORMANCE** thanks to the innovations introduced by our products. Enthusiasm and great care have been taken by our R&D technicians to propose this new evolved shock absorber that offers state-of-art for technique and performance.

### CLU 11 - CLU 32

**IL MONO HIGH PERFORMANCE** "L'anello mancante" tra l'impiego stradale e quello racing.

Dedicato al montaggio sulle moto di utilizzo strada o sportivo.

### CLU 11 - CLU 32

**THE HIGH PERFORMANCE MONOSHOCK** The "missing link" between road and race.

This shock is dedicated to road & sporting motorcycles.

**CARATTERISTICHE TECNICHE** Pressurizzato ad Azoto, con pistone flottante di separazione olio/gas in camera di compensazione. Stelo pistone Ø16mm con trattamento antifrizione e boccole guida a basso indice di attrito. Testa di attacco superiore ed inferiore in lega di alluminio aeronautica realizzate con macchine di precisione CNC.

**TECHNICAL FEATURES** Nitrogen pressurised, with oil/gas separating floating piston in the compensation chamber. Ø16mm piston rod with anti-friction treatment and low friction bushing. Upper and lower head in aeronautical aluminium alloy, combined with CNC precision machining.

30

La regolazione del precarico molla è affidata al precarico idraulico azionabile sia a mano che con chiave ad esagono da 14mm.

Applicato su tutti gli ammortizzatori dotati di precarico idraulico dedicati a BMW, il volantino a tre lobi con la sua forma ergonomica, permette una più agevole regolazione senza l'aiuto di scomodi attrezzi. Disponibile anche come ricambio, può essere applicato a tutti i precarichi idraulici dei modelli XXF-CLU-CYU e XZE prodotti dal 2009 ad oggi.

**The spring adjustment** is offered by the hydraulic preload, which can be operated manually as well as with 14mm hexagonal key.

Applied to all shocks absorbers for BMW which have an hydraulic preload. This handgrip has an ergonomic design with three arms that make easier the adjustment without any uncomfortable tools. Available as spare part and it could be applied into all hydraulic control at the mono shocks XXF-CLU-CYU and XZE series produced since 2009.

La vaschetta di compensazione è separata del corpo per un migliore raffreddamento del fluido e per maggiore libertà di posizionamento. È collegata da un tubo flessibile per altissime pressioni in treccia metallica rivestita per migliorare la risposta dell'ammortizzatore aumentando il grip ed il comfort.

**The compensation tank** is separate from the body for better fluid cooling and freedom of positioning. It is connected by a flexible hose for very high pressure in a coated metal plate for improving the shock feedback and increasing the grip and comfort.

## XZE 01 - versatilità e personalizzazione.

**IL PUNTO DI PARTENZA** Questa sospensione, regolabile nella precarico molla, migliora il comfort ed il controllo del veicolo durante la guida. È l'ammortizzatore base della nostra gamma di mono ammortizzatori, per la sua versatilità, viene utilizzato sulle naked, stradali e alcuni maxi scooter.

### XZE 11 - CON INTERASSE REGOLABILE

L'interasse regolabile trova il suo scopo quando si vuole modificare il bilanciamento originale.

### XZE 31 - CON PRECARICO MOLLA IDRAULICO

Il terzo step della serie è arricchito dal precarico molla idraulico di facile utilizzo ogni qualvolta sia necessario ripristinare l'assetto con ulteriori carichi.

## XZE 01 versatility and customization.

**THE STARTING POINT** This suspension, adjustable on the spring preload, improves the comfort and riding control of the vehicle. This is the base version of our range of mono shocks; thanks to its versatility, it is used on naked, road bikes and some maxi scooters.

### XZE 11 - ADJUSTABLE LENGTH

The adjustable lenght is useful when it is needed to modify the original balance.

### XZE 31 - HYDRAULIC SPRING PRELOAD

The third step is enriched by the hydraulic spring preload, which is easy to use whenever it is needed to restore the set-up after additional load.

## MONO POSTERIORE REAR MONO SHOCK

### WZM

€ 547,50 + IVA

#### WZM compatto e... di grande efficacia.

**RISOLVE SITUAZIONI DIFFICILI** Migliore controllo del veicolo durante la guida grazie all'idraulica interna. Questo prodotto ha avuto un grande successo nella particolare applicazione Suzuki TL1000R ed S. Con il mono WZM potrete eliminare il pesante dispositivo originale, avrete così una migliore stabilità e maneggevolezza.

*WZM when compact means... complete.*

**THE JACK OF ALL TRADES FOR DIFFICULT APPLICATIONS**

This shock allows a better vehicle riding control thanks to its internal hydraulic. With the WZM mono shock you can replace the heavy original shock and achieve a better stability and handling.

### WZE

€ 340,50 + IVA

#### WZE comfort e stabilità del mezzo.

**FACILITÀ DI CONDUZIONE** Questo ammortizzatore migliora la stabilità e controllo del veicolo durante la guida grazie al sistema idraulico interno in grado di copiare al meglio le imperfezioni di asfalto (crepe, buche, ondulazioni), mantenendo la corretta stabilità del mezzo. Ideale equipaggiamento su moto di peso contenuto e scooter.

*WZE comfort and riding stability.*

**EASY RIDE** This shock improves the stability and riding control of the vehicle thanks to its internal hydraulic system allowing to face the asphalt roughness (cracks, holes, undulations), keeping the correct stability of the vehicle. Ideal equipment for light weight bikes and scooters.

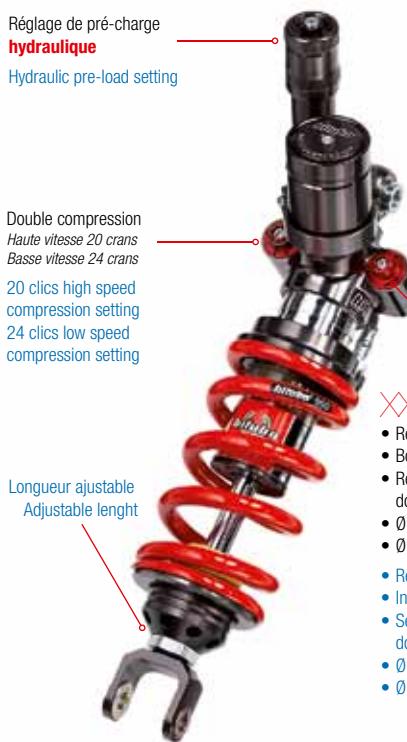

**CARATTERISTICHE TECNICHE** Ammortizzatore pressurizzato a gas (Azoto), con pistone flottante separatore olio/gas. Serbatoio di compensazione collegato tramite tubo flessibile in treccia metallica rivestita per altissime pressioni (solo WZM). Corpo ammortizzatore in acciaio legato ad alta resistenza, stelo in acciaio Ø12mm.

**TECHNICAL FEATURES** Gas (Nitrogen) pressurized shock absorber, with oil/gas separating floating piston. Compensating tank connected with steel braided flexible hose for very high pressures (WZM only). Body in high resistance steel, Ø12mm steel rod, billet aluminium heads with CNC machining.

### Mono amortisseur RACING Racing Monoshock

**XXF11 - XXF31**

Le mono amortisseur Racing avec 3 réglages hydrauliques séparés (XXF31). Un soin particulier a été apporté au design, très compact et très léger. Des études ont été effectuées pour réduire la friction, et notamment le phénomène de «stick-slip». Les mouvements de masse ont été considérablement réduits pour limiter l'inertie lors des changements rapides de trajectoire, et pour améliorer la performance aux hautes fréquences d'oscillation.

Racing Monoshock with 3 separate hydraulic settings (XXF31V2). Particular attention was given to the design, very compact and lightweight. Studies have been conducted to reduce friction, and «stick-slip» phenomenon. Mass movements were significantly reduced to limit inertia during fast changes of trajectory, and to improve performance at high frequencies of oscillation.
