FRIZIONI AUTOMATICHE

Radius X

Nuova Radius X

La nuovissima frizione unisce il meglio dei due mondi Rekluse: la tecnologia TorqDrive® e il disco automatico EXP.

VANTAGGI DELLA NUOVA LINEA

- Regolazione esterna disponibile sia per i modelli a cavo (tramite registro sul bracciale) che idraulici
- Una frizione automatica che scarica maggior potenza a terra
- Trasferimento di coppia migliorata
- Dilatazione della frizione ridotta

Radius CX

RadiusCX è l'ultima evoluzione della tecnologia in termini di frizione. Questo prodotto di fascia alta riunisce le nostre ultime innovazioni in un solo pacchetto. RadiusCX offre ai piloti più esigenti un significativo incremento delle prestazioni della frizione automatica garantendo durata, ottimo feeling della leva e un miglior trasferimento di potenza a terra.

Per i modelli di moto con comando frizione a cavo (Honda/Kawasaki/Yamaha/Suzuki) e per moto con frizione idraulica (KTM, Husqvarna, Sherco, Gas Gas), combina le tre tecnologie di Rekluse: componenti in alluminio billet di qualità aerospaziale, tecnologia centrifuga EXP e dischi frizione TorqDrive. Insieme al nuovo design e alla regolazione esterna (ove prevista), il risultato è un'esperienza più piacevole di guida e performance senza eguali.

Core EXP 3.0

La frizione CORE EXP è la frizione automatica utilizzata nel mondiale! Utilizza la componentistica di primissimo livello delle frizioni CORE MANUAL con l'aggiunta dell'automatismo. Design migliorato per ridurre l'attrito e l'accumulo di calore in modo che i componenti durino più a lungo. Tutte le frizioni Rekluse sono testate e sviluppate con i migliori team mondiali per performance senza eccezioni ed affidabilità assoluta e costante nel tempo. Composta da tamburo, dischi condotti speciali, 2 set di molle con svariati carichi di lavoro, carter irrobustito con capacità olio maggiorata. Per le moto con frizione idraulica è dotata di attuatore esterno che consente una regolazione rapida con chiave a brugola direttamente sull'attuatore stesso

FRIZIONI MANUALI

TorqDrive Clutch Pack

E' possibile avere la tecnologia TorqDrive da installare nel gruppo frizione originale senza la necessità di sostituire altri pezzi se non i dischi stessi.

Testata ai più alti livelli di competizione, la tecnologia dei dischi frizione sottili TorqDrive consente di inserire più dischi nella frizione originale, riducendo lo slittamento e scaricando a terra tutta la potenza del motore. Sia che tu voglia stabilire un nuovo record oppure allenarti sul tuo percorso preferito, il TorqDrive Clutch Pack ti darà il vantaggio che stai cercando.

Core Manual TorqDrive

Le nuove frizioni con tecnologia TORQ DRIVE permettono di ottenere prestazioni senza precedenti. La realizzazione con materiali speciali ha consentito di realizzare questa generazione di frizioni che con minor carico molla garantisce resistenza allo slittamento ben superiore ad una frizione tradizionale. Questa particolarità si traduce in robustezza: la frizione non slitta anche nei carichi più gravosi, non scalda e diventa veramente robusta ma contestualmente rende il comando leva morbidissimo per un feeling di guida veramente senza eguali.

Core Manual

La Frizione Rekluse CORE MANUAL è composta da tamburo centrale, un set di dischi condotti speciali, molle, spingidisco manuale. Tutti i componenti Rekluse sono studiati e costruiti per fornire le migliori prestazioni e durata in sostituzione dei componenti originali tipicamente realizzati in fusione. Ideale per uso gara con in abbinamento la campana rinforzata Rekluse.

COMPONENTI

Carter Frizione

Carter frizione realizzati in Anticorodal più robusti agli urti degli originali, cavità maggiorata per il montaggio delle frizioni Rekluse, aumentano il volume d'olio per un funzionamento più lineare nelle condizioni estreme.

Campane Frizione

Le campane Rekluse sono realizzate con particolari leghe, sono decisamente più robuste delle originali e non si "scalzano".

Sono scomponibili per cambiare all'occorrenza i parastrappi, con costi molto bassi, senza dover sostituire l'intero gruppo cestello come avviene con quelle originali.

Parastrappi realizzati con materiali ad alta qualità meccanica e chimica. Più robusti e durevoli degli originali.

Kit Freno Post. Manubrio

Da abbinare alle frizioni automatiche, questo kit composto da pompa freno idraulica, tubazione, tappi serbatoio e raccorderia permette di aggiungere il comando freno posteriore al manubrio abbinato al comando frizione.

FRIZIONI HARLEY DAVIDSON

Radius X

Liberate la vostra mano grazie alla frizione automatica Rekluse per Harley-Davidson. Arresto completo in marcia e accelerazione senza toccare la leva della frizione. L'azione manuale sulla leva della frizione è comunque possibile in qualsiasi momento per fermate e partenze.

Core Manual TorqDrive

La frizione manuale Rekluse TorqDrive™ è progettata per soddisfare le esigenze del vostro motore ad alte prestazioni. Mentre le altre frizioni slittano, la TorqDrive™ agguanta l'asfalto, non dilata, e scarica la potenza a terra. La nuova tecnologia di Rekluse offre vantaggi prestazionali che si possono effettivamente sentire!
