POWERBOMB HEADERS STAINLESS STEEL AND TITANIUM

- Utilize FMF's patented module precisely located at the initial stage of the header for specific applications
- Position "Bomb" increases performance
- Horsepower is increased as much as 10%
- Act as "pre-muffler" helping to lower the decibel output
- The expansion and contraction of exhaust sonics through the system causes increased flow
- Available in stainless steel for strength combined with light weight, or in titanium for even greater weight savings
