## FACTORY FATTY REV PIPES

- These pipes focus their power delivery in the middle and upper rpm of the power band
- If riders are running out of power up top, want more time between shifts and do a lot of deep berm or sand riding, the FMF Rev is their pipe of choice
- FMF Racing's Tru-Flo stamping process ensures a perfect fit and optimum performance
- Incredibly durable nickel plating
- Dyno- and track-tested for every application
- Includes O-rings

## FACTORY FATTY PIPES

- Based on the successful exhaust pipe used by pro riders
- Cone section is shaped like the original Fatty, but with new features
- Constructed with two thicknesses of steel
- 19-gauge steel used on the header portion for optimum strength and durability; 20-gauge steel on body and rear section for increased weight savings
- Seams are hand pounded after stamping process for that factory look
- Comes in a raw, unplated, oiled finish
