

Wind shields

Founded more than twenty five years ago, MRA has its roots in motorcycle racing. This led to their name: MRA = Motorcycle Racing Accessories. In the first few years, MRA developed and supplied products such as motorbike fairings, screens and racing seats for the racetrack. Towards the end of the eighties, MRA specialised in the exclusive development and manufacture of motorbike screens. MRA is currently one of the most famous brands in motorcycle accessories.

Wind shields

Origine windshield

Windshield OE type. Shape, profile and size match your bike's original screen.

Sport windshield

Sport screen.

This type of screen matches the original around its base and, typically, is also similar in length, but the addition of a small spoiler section at its upper rear edge is normally slightly taller than standard.

Racing windshield

Racing screen. This type of screen was originally developed by MRA for competition and is used today by many high-level racers including works MotoGP teams. The lower part of the Racing Screen corresponds to the original profile, but with a bubble-shaped extension in the centre to improve aerodynamics and deflect wind pressure away from your helmet.

Touring windshield

The Touring Screen has a similar shaped base as your bike's standard screen but, typically, is longer and taller. Its extra length and height is created by an upwardly sloping rear section over its entire width, designed to deflect wind pressure away from the rider, ensuring an easy, relaxing ride - even on long trips.

Wind shields

Vario windshield

Two models of Vario screen are available, the first is height adjustable, the other is tiltable. Thanks to his many settings possibility, this screen fits perfectly to riders needs. Available as a transparent or tinted model.

Vario (height)

Height adjustable. The Vario Screen is in two-parts, the upper/front section of which can be adjusted in height by up to 5 cm, to find the optimum position for individual riders. Its special design provides an air inlet at the base of the front section, admitting a controlled flow of air behind the screen, providing a large reduction in wind pressure without creating excessive additional drag or turbulence.

5cm of setting range

Vario (tilt)

Tilt adjustable. This screen has a mounted spoiler at its rear edge which, without the use of tools, can easily be adjusted into one of seven positions to suit your needs. Positioned on the top rear edge of the screen for maximum effect, the air current is spread out and slowed down, virtually eliminating turbulence.

7 positions

Clear

Smoke

Arizona windshield

The Arizona touring windshield is a touring windshield with extra height.

Naked bikes deflectors

MRA propose a range of screens for naked bikes, adaptable to your roadster. A mounting kit is required, please see table below.

Small size riders, will have a better protection with the windshield in more horizontal position whereas taller riders should set it in vertical position.

Road shield wind deflector

A midsize screen that is ideal for trials bikes and roadsters. We have designed the screen with extra width to avoid turbulence at the sides. Available in clear, smoked grey and black with black rastered lowersection.

Racing wind deflector

Trendy Racing style now for sporty naked bikes ! Good wind protection. Dedicated to latests naked bikes models. Available in clear, smoked grey and black with black rastered lowersection.

Speedster wind deflector

A part from its contemporary and very attractive design, the Speedster screen improves wind protection on all Naked Bikes. Available in clear, smoked grey black, and colors with black rastered lower section.

Tourisme wind shield

This screen's plain and simple design makes it ideal for classic naked bikes and roadsters. The size of the screen protects the whole upper body from wind and rain, right up to the helmet.

Available in clear and smoked grey with black rastered lowersection.

NEW !

BIHR P/N

Wind shields

Custom wind shield

The rounded design of this screen suits the style of Cruisers or Choppers.

Available in clear and smoked grey.

Height adjustable wind shield

This screen comes in two parts. The upper part can be adjusted by 5 cm in height. Together with the adjustment for screen angle, this allows the motorcyclist to adjust the screen to an ideal position. The air vents in the lower part ensure an air current behind the screen, giving the rider turbulence-free wind protection.

Available in clear and smoked grey with black rastered lowersection.

Tourisme vario wind shield

Small screen with a big effect. You can fix the screen at any angle you want. The upper spoiler is adjustable in 7 positions and can be fixed at your favorite position.

Available in clear, smoked grey and black with black rastered lowersection.

Bulles Xscreen

Xscreen wind shields are tilt and height adjustable (no tool needed). So you can set the airflow at your convenience, at any time, depending on your route or weather conditions. They are available as a transparent or tinted model. The height adjustment is possible up to 11 cm. There are 2 ways of mounting : with single hinged joints or double hinged joints, depending on the settings you want to use.

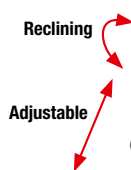

Two versions are available:

- **Xscreen XCS** : full screen comes with the spoiler sport Xscreen
- **Xscreen XCT** : wider screen than the XCS model, delivered with the X-screen touring spoiler.

The Xscreen screens are the only offer so much versatility!

Double hinged joint system

Single hinged joint mount

Double hinged joint mount

Xscreen XCC spoiler mounting kit (no drilling)

Mounting kit, allows spoiler assembling without drilling OE screen.
