

Sensor

Radio fan (Thermo) switch

Tourmax, made in Japan, is a world leader in spare parts of matching quality even higher than the original.

Thermostat sensor is one of the key element of the water cooled circuit. It activates the motorised fan unit when the engine temperature is too high. A failure of this unit should cause an engine's overheating.

This thermostat is :

- Screwed-on
- An one to one OE replacement part
- Supplied per unit
